1. Welcome

CRM Wala helps a small team keep track of **who they might sell to** (leads), **who they already work with** (contacts and companies), and **what they are selling** (deals). It reminds you what to do each day, shows your sales on a visual board, and can send follow-ups for you automatically.

This guide walks through the product in the order you will use it. Every screenshot comes from the demo workspace, so you can click along.

The three places you will visit

Address	Who it is for	What it is
http://localhost:3000 (your own domain once deployed)	Everyone on your team	The CRM itself: landing page, sign up, and the app.
http://localhost:3001	Platform administrators only	The Super Admin console (see chapter 14). Separate sign-in, always protected by two-step verification.

Try it with demo data

Demo account	Email	Role
Owner (full access)	demo@demo.crmwala.dev	Owner
Sales manager	priya@demo.crmwala.dev	Manager
Sales reps	rohit@demo.crmwala.dev / sneha@demo.crmwala.dev	Sales Rep
Read-only	vikram@demo.crmwala.dev	Viewer

The password for every demo account is **Demo@12345**.

Figure 1. The landing page. Use **Start free trial** to create your account.

2. Create your account and set up

Start your free trial

1. Open the website and click **Start free trial** (or go to **/signup**).
2. Enter your name, work email and a password. The strength bar under the password turns green when it is strong enough (10+ characters with letters and numbers).
3. Enter your company name, then choose your company size, industry and your role.
4. Click **Create workspace & start trial**. No credit card is needed.

The image shows the CRM Wala sign-up page on the left and a preview of the dashboard on the right. The sign-up page has a light gray background and a purple header with the CRM Wala logo. It features a 'Start your 3-day free trial' section with a subtext 'No credit card. No long-term commitment. Set up in under 2 minutes.' Below this are input fields for 'Your name', 'Work email', 'Password', 'Company name', 'Company size', 'Industry', and 'Your role'. A large purple button labeled 'Create workspace & start trial' is prominent. Below the button are four green checkmarks listing trial benefits: '3 days of full access', 'Import your data in minutes', 'Cancel or upgrade any time', and 'Your data is never deleted'. A link 'Already have an account? Sign in' is at the bottom. The dashboard preview on the right has a dark blue background with white text. It says 'Know exactly what's happening in your business — and what to do next.' followed by three green checkmarks: 'Today's Focus tells you who to contact', 'Drag-and-drop pipeline with live totals', and '3-day free trial, no card required'. Below this is a screenshot of the dashboard interface, which includes a sidebar with 'Home', 'Leads', 'Pipeline', 'Tasks', and 'AI Assistant'. The main area shows a 'Good morning, Aarav' greeting, a 'Today's Focus' section with 5 follow-ups, 2 meetings, 3 deals needing attention, and 1 overdue task. It also displays revenue metrics: ₹15.9L (+172%), Pipeline ₹2.40Cr (10 deals), and Win rate 70% (+8.3 pts). A 'Revenue over time' line chart and a 'Sales pipeline' table are also visible.

Start your 3-day free trial

No credit card. No long-term commitment. Set up in under 2 minutes.

Lumen ₹4.5L RV			

Figure 2. The sign-up page. Required fields show a red message if you skip them.

Note: Your trial lasts **3 days** with everything unlocked. When it ends your data is **never deleted** - you simply choose a plan to continue (chapter 12).

Signing in later

Go to **/login**, enter your email and password. If you turned on two-step verification you will be asked for the 6-digit code from your authenticator app. Forgot your password? Click **Forgot password?** and follow the emailed link.

Figure 3. The sign-in page.

Quick setup (5 steps)

After signing up you see a short setup wizard. It takes about two minutes and tailors the workspace to you. You can skip anything you are unsure about.

- **Business** - confirm your company name, optional website and industry.
- **How you sell** - business-to-business, consumers, agency, consulting, and so on.
- **Team size** and **Goals** - pick everything that applies, such as managing leads or tracking deals.
- **Import** - bring in contacts from a spreadsheet now, or skip and do it later.

The screenshot shows the CRM Wala setup interface. At the top left is the CRM Wala logo. At the top right, a notification states "Your free trial has started - 2 days left" with a close icon. Below the header, a progress bar indicates "Step 1 of 5 - Business" with a 20% completion mark. The main heading is "Tell us about your business" with a subtext "This helps us tailor your workspace." The form includes a "Company name" field with "Guide Co" entered, a "Website" field with "https://yourcompany.com", and an "Industry" dropdown menu set to "Select...". At the bottom, there are "Back" and "Continue" buttons.

Back Continue

Figure 5. Step 2: choose how you sell. The selected card shows a tick.

3. Finding your way around

Everything lives in the menu on the left. The top bar has search and a **Create** button. Both are available on every page.

Figure 6. The Home screen with its main controls marked.

#	What it is	How to use it
1	Menu	Click an area to open it. The small badge on Tasks shows how many things need attention.
2	Search	Type a name, company or deal to jump straight to it.
3	Create	Add a lead, contact, company, deal, task, meeting, note or call from anywhere.
4	Get started checklist	Five first steps. Click Hide once you are comfortable.
5	Today's Focus	Follow-ups, meetings, deals needing attention and overdue tasks - your to-do for today.

The command palette (fastest way to do anything)

Press **Ctrl+K** (**Cmd+K** on a Mac) anywhere. Type what you want - "create deal", "go to reports", "switch to dark mode" - and press Enter.

Figure 7. The command palette. Arrow keys move, Enter selects, Esc closes.

Quick create

The blue **Create** button opens a menu so you can add a record without leaving the page you are on. Pressing the letter **C** opens the same list.

Figure 8. The Create menu.

Keyboard shortcuts

Keys	Action
Ctrl/Cmd + K	Open the command palette
C	Create something new
?	Show all shortcuts
[	Collapse or expand the left menu
G then H / L / C / D / P / T	Go to Home / Leads / Contacts / Deals / Pipeline / Tasks (press G, release, then the letter)
G then K / R / J / S	Go to Calendar / Reports / AI Assistant / Settings

Tip: Switch between light and dark mode from the command palette or the sun/moon button on the sign-in pages.

4. Leads

A **lead** is someone who might become a customer. Every lead gets an automatic **score** from 0 to 100 (the small ring beside the name) based on how complete their details are, how they found you and how recently you talked. Work the highest scores first.

The screenshot shows the CRM Wala interface. On the left is a sidebar with navigation links: Home, Inbox, Leads (selected), Contacts, Companies, Deals, Pipeline, Tasks, Calendar, Activities, Automations, Reports, AI Assistant, Integrations, and Settings. Below the sidebar is a 'Free trial 2 days left' banner and user information for 'Acme Demo Co' and 'Aarav Mehta'. The main content area is titled 'Leads' and shows '30 leads'. At the top right of the main area are buttons for 'Import', 'Export', and 'New lead'. Below the title are tabs for 'All leads', 'My leads', 'Hot leads', 'Overdue follow-ups', 'Not contacted in 7 days', and 'New this week'. The 'All leads' tab is active. Below the tabs is a search bar 'Search leads by name, email or company...' and a 'Filters' button. The leads are listed in a table with columns: NAME, COMPANY, STATUS, SCORE, SOURCE, OWNER, and NEXT FOLLOW-UP. The table contains 10 rows of lead data.

NAME	COMPANY	STATUS	SCORE	SOURCE	OWNER	NEXT FOLLOW-UP
OG Oliver Grant oliver.grant@northwindtrading.com	Northwind Trading VP Sales	Qualified	81	Website	SK Sneha Kapoor	3 Oct, 11:00 am

FA Farhan Ali	All & Sons Exports	Contacted	81	Referral	PS Priya Sharma	—

Figure 9. The Leads list. Use the tabs at the top (All leads, My leads, Hot leads, Overdue follow-ups...) for ready-made views.

Add a lead

1. Click **New lead** (or press **C**, then choose Create lead).

2. Fill in at least the first name. Everything else is optional; add an email or phone so you can contact them.
3. Click **Create lead**.

Figure 10. The New lead panel slides in from the right.

Search, filter and sort

- Type in the search box to find by name, email or company.
- Click **Filters** to narrow by status, owner, source, tags or score.
- Click a column title to sort. The column button next to Filters lets you show or hide columns.
- Tick the boxes on the left of rows to act on many leads at once (assign an owner, change status, add tags, delete).

Figure 11. Filters let you answer questions like "hot leads from LinkedIn that nobody owns".

Open a lead

Click a lead to see everything about them: a timeline of every email, call, note and task; their details; and an **AI summary** that suggests your next step.

Figure 12. A lead record. Tabs along the top switch between Activity, Notes, Tasks, Emails, Calls, Meetings and Files.

When a lead is ready: convert it

Click **Convert lead**. The lead becomes a **contact** (and a **company**), and you can create a **deal** in the same step.

Tip: Use **Email** and **Call** on the record to log or send straight away - everything lands on the timeline automatically.

5. Contacts and companies

Contacts are people you work with. **Companies** are the organisations they belong to. Open a company to see all its contacts, deals and conversations in one place.

Figure 13. The Contacts list works like Leads: search, filter, sort and select several rows.

Keeping data clean

- **Duplicates:** Settings > Import & export shows suspected duplicates and lets you merge them without losing history.
- **Tags:** add tags (for example *enterprise* or *partner*) to group records, then filter by them.
- **Custom fields:** add your own fields such as "Preferred language" (see chapter 11).

6. Deals and the pipeline

A **deal** is an opportunity with a value and a stage. The **Pipeline** shows every open deal as a card in columns from first contact to won.

Figure 14. The Pipeline board. The header shows total and weighted value (value x chance of winning).

Move a deal

1. Point at a card, then press and hold the mouse button (or hold your finger on a touch screen).
2. Drag it to another column.
3. Let go. The change saves instantly and the totals update.

Tip: Dropping a deal into **Won** adds its value to your revenue. Dropping it into **Lost** asks for a reason so you can learn from it later.

Read a card

Each card shows the deal name, company, value, expected close date (red when it is overdue), a ring with the chance of winning, and the owner's initials.

Open a deal

Click a card to see the full record with stage tracker, timeline, notes, tasks, files and an **AI summary** with a win-probability estimate.

Figure 15. A deal record. Use **Won** or **Lost** at the top right to close it.

Add a deal

Click **New deal**, give it a name, a value and a company or contact, and choose where it starts. Use **Stages** to rename, reorder or add pipeline stages to match how you really sell.

7. Tasks and calendar

Tasks

Tasks are your to-do list, grouped as **Overdue**, **Due today**, **Upcoming** and **Completed**. Type in the quick-add box and press Enter to add one in seconds.

Figure 16. The Tasks page. Tick the circle to complete a task; switch between List, Board and Calendar at the top right.

Calendar

The calendar shows meetings, scheduled calls, tasks, deadlines and lead follow-ups in one place, colour-coded. Switch between **Day**, **Week** and **Month**, tick **Only mine** to hide teammates' items, and click **Schedule meeting** to add one.

Figure 17. The Month view. Click any day to add something to it.

8. Automations

Automations do repetitive work for you. Each one has a **trigger** ("when a lead is created") followed by **steps** (assign it, create a task, wait two days, send an email...).

Figure 18. The Automations page lists yours, with run counts and an on/off switch. Templates help you start fast.

Build or edit one

1. Click **New automation**, or pick a template such as "Welcome & follow-up for new leads".
2. Click the trigger box at the top and choose when it should start.
3. In **Add a step** on the right, click an action (Send email, Assign user, Create task, Add tag, Change status, Send notification, Webhook, Wait...).
4. Click **Test** to run it safely with sample data - nothing is actually sent.
5. Turn on **Active** and click **Save**.

Figure 19. The visual builder. Steps run top to bottom; **Run history** shows every execution.

Tip: Use **Wait** steps to space out follow-ups. Automations pause at the wait and resume by themselves.

9. Reports

Choose a report on the left (Revenue, Sales, Leads, Conversion, Pipeline, Team performance, Deal velocity, Activity, Forecast, Customer acquisition). Pick a date range at the top - 7 days, 30 days, 90 days, 12 months or a custom range - and optionally a team member.

Figure 20. The Revenue report. Switch between **Chart** and **Table** to see the exact numbers.

Share and schedule

- **CSV** downloads the data for a spreadsheet; **PDF** gives a printable report.
- **Save / schedule** saves the current filters and can email the report to you daily, weekly or monthly.

10. AI Assistant

Ask questions in plain English. The assistant looks only at **your own workspace data**, and only what your role is allowed to see.

Figure 21. The AI page. Click a suggestion or type your own question. The meter shows this month's usage against your plan.

Examples to try

- "What should I focus on today?"
- "Which deals are most likely to close this month?"
- "Which leads haven't been contacted in 7 days?"
- "Which salesperson has the highest conversion rate?"
- "Why is my pipeline declining?"

Figure 22. An answer lists real deals from your pipeline, ranked by value and likelihood.

The **Insights** tab shows suggestions without asking: next best actions, deals at risk of going cold, data clean-up ideas and a pipeline health check.

11. Integrations, team and settings

Integrations

Connect the tools you already use - email (Gmail, Outlook), calendars, Slack, Teams, WhatsApp, Zoom, payments and more. Use the category tabs or search, then click **Connect**. Some connections need an administrator to add credentials first; until then they run in a safe preview mode that does not contact the outside service.

Figure 23. The integrations marketplace.

Settings

Open **Settings** from the menu. Personal settings are on the left top (profile, notifications, security); workspace settings below them.

Section	What you can do
Profile & preferences	Name, photo, language, time zone.
Security	Change password, turn on two-step verification, see and end your sessions.
Team	Invite people, change roles, remove members.
Roles & permissions	Control exactly what each role can see and do.
Pipelines & stages / Lead statuses	Match the process to your business.
Custom fields / Tags	Add your own fields and labels.
Import & export	Bring data in from CSV; download everything.
Audit log	See who changed what and when.
Billing & plan	Plan, usage and invoices (chapter 12).

Invite your team

1. Go to **Settings > Team** and click **Invite**.
2. Enter their email and choose a role. They receive a link to join.
3. Roles: **Owner** (everything), **Admin**, **Manager**, **Sales Rep** and **Viewer** (read-only). Create your own under Roles & permissions.

Figure 24. The Team page shows each member's role, last sign-in and whether they use two-step verification.

Import and export your data

1. Open **Settings > Import & export** and choose what you are importing (contacts, leads, companies or deals).
2. Drag in a CSV or Excel file. The first row should be column names.
3. **Map columns** - match each spreadsheet column to a CRM field (we guess for you).
4. **Review** - the preview flags problems and possible duplicates before anything is saved. Then confirm.

Figure 25. Step 1 of the importer. The lower half lets you download your data at any time.

Tip: Exporting always works, even if a trial has ended - your data stays yours.

12. Plans, trial and billing

Open **Billing & plan** from Settings or click **Choose a plan** in the trial box at the bottom of the menu.

Figure 26. The Billing page: current plan, usage against limits, and plan comparison below.

Plan	Price (per month)	Best for
Starter	Rs. 999	Individuals and very small teams
Growth	Rs. 2,499	Growing sales teams
Business	Rs. 5,999	Larger teams that need more control
Enterprise	Custom	Custom limits, SSO and dedicated support

Annual billing is discounted. Prices exclude GST, which is added at checkout.

Upgrade

1. Choose **Monthly** or **Annual**. Enter a coupon code in the box if you have one.
2. Click **Choose plan** on the plan you want. A summary shows exactly what you will pay today, including tax.
3. Click **Continue to payment** and complete the secure payment page.

Figure 27. The price summary before you pay.

What to expect

- **Upgrades** apply immediately and you only pay the difference for the rest of the period.
- **Downgrades** start at the end of your current billing period - you keep what you paid for.
- **Cancel** anytime from Billing; access continues until the period ends. You can resume before then.
- **Failed payment:** you keep access for a short grace period while we retry; update your card to fix it.
- **Trial ended or unpaid:** the workspace becomes read-only except for Billing and Export. Nothing is deleted, and picking a plan unlocks everything again.

- **Invoices** are listed on the Billing page and can be downloaded as PDF.

Note: The demo environment uses a **test checkout**: no real card is charged. Use the card number pre-filled on the page.

13. Using CRM Wala on your phone

The app works on phones and tablets. On a small screen the left menu becomes a **bottom bar** (Home, Leads, Deals, Tasks, More) and a round + button opens quick create.

Figure 28. Home and Pipeline on a phone. Swipe sideways on the pipeline to see more stages.

Tip: Add the site to your phone's home screen from the browser menu for one-tap access.

14. Super Admin guide (platform administrators)

The Super Admin console is a **separate application** for the people who run the platform. Customers can never reach it, and customer sign-ins do not work there. Every action is recorded in the audit log.

Sign in with two-step verification

1. Open the admin address (for example **http://localhost:3001**) and enter your admin email and password.
2. **First time only:** scan the QR code with an authenticator app (Google Authenticator, 1Password, Authy...) and enter the 6-digit code.
3. Next time, enter the code from your app after your password.

Figure 29. The admin sign-in page.

Figure 30. Enter the 6-digit code from your authenticator app.

Note: Sensitive actions (impersonation, deleting, refunds, adding admins) ask for a fresh code if you have not verified in the last hour. This is normal.

Dashboard

The dashboard shows monthly and annual recurring revenue, users, workspaces, trials, paying customers, trial-to-paid conversion and churn, with charts for signups, revenue, trial conversion and subscriptions. Use **7d / 30d / 90d** to change the range.

Figure 31. Platform overview.

Users and workspaces

Users lists everyone who signed up; click a person for details, sessions and recent activity.

Workspaces lists customer accounts with plan, status, usage and last activity. Both can be searched and filtered.

The Users dashboard provides a list of all users who have signed up across all workspaces. It includes a search bar and filters for status, plan, and subscription.

Users
Everyone who has signed up, across all workspaces.

Search and Filters:

- Search name, email or company...
- All statuses

Figure 33. Workspaces. Click a name to open it.

Manage a workspace

Open a workspace to see its plan, renewal date, credit and record counts, usage against limits, members, billing history and integrations.

← Workspaces

Northwind Traders • active

sample-1-northwind-traders · created 24 Aug · access: full

1 Extend trial 2 Change plan 3 Suspend

Plan: Growth (monthly)

Renews: 14 Oct

Account credit: ₹0

Records: 0 (0 contacts · 0 leads · 0 deals)

Usage & limits | Members: 1 | Billing | Integrations | Admin actions

Usage against limits

Overrides replace the plan limit for this workspace only.

team members: 1 / 10 | contacts: 0 / 10,000

pipelines: 1 / ∞ | automations: 0 / 25

AI actions this month: 0 / 500 | MB of storage: 0 / 10,240

emails this month: 0 / 10,000

4 Edit limits

Figure 34. A workspace page. Actions are at the top right; tabs below show members, billing and more.

#	Action	What it does
1	Extend trial	Adds days to the trial, or restarts an expired one.
2	Change plan	Assigns a plan without charging (a complimentary gift or correction).
3	Suspend	Blocks access for everyone in the workspace. Data is untouched. Reactivate at any time.
4	Edit limits	Overrides plan limits for this customer only (for example more contacts).

Confirmations, reasons and impersonation

Risky actions never happen with one click. Suspending or deleting asks you to **type a confirmation** and give a **reason**; the reason is saved in the audit log.

Figure 35. Extending a trial.

Figure 36. Suspending requires a reason before the red button activates.

Impersonation lets support see exactly what a customer sees. Open the workspace's **Members** tab, click **Impersonate**, enter a reason and your verification code. A new tab opens in the customer app with a red banner at the top. The link works once and expires in two minutes; everything you do is logged under your name.

Plans, coupons and payments

Plans & limits controls prices, limits and which features each plan includes. Changes apply immediately - no developer needed. **Coupons** creates discount codes (percentage or fixed, one-time or recurring, expiry, plan restrictions). **Billing & payments** shows revenue, failed payments and lets finance staff issue refunds.

Figure 37. Plans. Click the pencil on a card to edit it.

Feature flags

Switch product features on or off for everyone, release them gradually with the **Rollout** percentage, or force them on or off for one workspace using **Add** under Workspace overrides.

Figure 38. Feature flags.

Audit logs

A permanent record of admin and customer actions. Search, filter by actor, action or date, click a row with an arrow to see before and after values, and click **Export CSV** to download.

Figure 39. The audit log.

System health

Shows whether the database, queue, storage and providers are healthy, plus recent background jobs, email delivery, payment webhooks, server errors, broken integrations and suspicious sign-in attempts. It refreshes every 30 seconds.

Figure 40. System health.

Email templates

Edit the emails the platform sends (welcome, trial ending, payment failed, invoices...). The preview updates from the saved version, and **Send test to me** emails it to you. Variables such as `{{ name }}` are filled in automatically.

Figure 41. Editing an email template.

Platform settings and the admin team

The screenshot displays the 'Platform settings' page in the CRM Wala Super Admin interface. The sidebar on the left lists various navigation options under categories like Overview, Accounts, Revenue, and Platform. The 'Settings' option is currently selected. The main content area shows five settings cards, each with a title, a description, a value field, and a 'Save' button or toggle. The settings are: Free trial length (3 days), Failed-payment grace period (3 days), Tax (GST 18%), Allow new signups (toggle on), and Maintenance mode (toggle off).

Figure 42. Platform settings.

Setting	Meaning
Free trial length	Days a new workspace can use everything for free.
Failed-payment grace period	Days of continued access after a payment fails.
Tax	Name and percentage added to invoices (GST 18% by default).
Allow new signups	Turn off to pause registrations.
Maintenance mode	Shows a read-only maintenance banner.

Admin team (superadmin only) adds staff with one of three roles: **Superadmin** (everything), **Support** (users, impersonation, trial extensions) and **Finance** (plans, coupons, credits and refunds).

15. Tips and troubleshooting

Habits that work well

- Start each day on **Home** and clear Today's Focus top to bottom.
- After every call or meeting, log a note and set the next task - the follow-up is what wins deals.
- Keep the pipeline honest: move deals as soon as something changes, and set realistic close dates.
- Use automations for the follow-ups you always forget.
- Review **Reports > Pipeline** weekly with your team.

Common questions

Question	Answer
I can't see a menu item or button.	Your role may not include it. Ask a workspace owner or admin to change your role (Settings > Roles & permissions). Some features also depend on your plan.
The page says my trial has ended.	Your data is safe. Choose a plan in Billing to unlock everything. You can still export your data.
I'm told I reached a plan limit.	Your plan caps things like contacts or automations. Check usage on the Billing page, then upgrade or ask your platform administrator about an override.
I was signed out.	For security, sessions expire after inactivity. Sign in again - you return to the page you were on.
I lost my authenticator device.	A platform administrator can reset your two-step verification. Contact support.
An import found errors.	The review step lists the rows and reasons. Fix the spreadsheet and upload again, or fix just those rows and continue.
Something looks wrong or broken.	Refresh the page. If it persists, send support the Reference code shown on the error message so they can find it in the logs.

Tip: Need more help? Press ? in the app to see shortcuts, or contact your workspace owner or support team.
